Way To Determine Protein In Milk Developed At VPI

A quick and relatively easy way to determine the total protein in milk has been developed by dairy researchers at VPI.

The scientists explain that milk's nutritive value is determined largely by the the amount of milk fat and milk protein it contains. Milk fat content is tested regularly by dairies and dairy cattle breed associations. Protein, however, is not regularly tested, mainly because the present official method (the Kjeldahl method) is too involved to make large-scale tests easily.

The method developed at VPI makes possible the determination of total milk protein in milk of individual cows with the same ease and speed as is now done with milk fat.

Today in Europe, some milk-pricing systems are based on both the fat and protein content. Also, nutritionists are placing more emphasis on the high quality milk proteins.

INDEPENDENCE DAY

Since the year 1776, the Fourth of July has been properly celebrated as one of our top days of national remembrance. It was on July 4, 1776 that the Colonies in America proclaimed their Independence and set about to form a new nation on this continent. Therefore, July, is a National Birthday, And it is indeed in order that we never allow a July 4th to pass without a salute to the great people who stood up for their rights and offered their very lives for Independence.

But there is another way of looking at it, too. The sacrifices of our Founding Fathers will have been lost if we do not treasure and strive to maintain in Free America the Independence and basic principles they established.

Surely, one of the prime motives of these great Founding Fathers was that "Life, Liberty and the Pursuit of Happiness" was a cherished blessing. They fought for that. Many gave their lives for that. And it is as precious today.

It is our feeling that America must keep its localities Strong. The basic concept of American Freedom begins in the home, on the farm, in the community, in the churches, in the schools, and in the over-all economy of our nation. It "builds up" rather than "flows down." And so, we do not hesitate to bring to our friends in this wonderful Center Trade Community of Virginia — right in the very geographical center of the "Mother of States" — the message that we do well to honor the past, but we also do well to build up our home town as a strong business center, Every dollar spent "at home" does double duty. You get value received for your expenditure. But . . . as a BONUS . . . you get the strengthening of your community, in all of its institutions and services. The more business done in Appomattox . . . the more dollars spent where the dollars are earned . . . the more Appomattox can serve you and make it to your advantage to be proud of your Home Area.

The Founding Fathers were proud of the Way of Life they established. They truly believed that Freedom and Independence were worthy of every effort. In that spirit, we invite you, as friends and neighbors, to do your business in Appomattox. Local business and local institutions have a tremendous investment in Appomattox. For your investment in Appomattox, we invite you to help us build toward a broadening horizon of opportunity and successful life in this great Free America. This Fourth of July, let us be proud to be Free Americans, and let us dedicate our best efforts to make every tomorrow a better day.
